Honorary Student Scholarship, U.C. Berkeley, School of Optometry
Alcon Honorary Laboratory Trip, U.C. Berkeley, School of Optometry
Dean's Honor Roll
University of California, Berkeley, School of Optometry
University of California, Davis

LECTURES Vision and Aging (January 1990)
Normal age-related changes affecting the eyes, from ocular adnexa through the
optic nerve. Sepulveda VAMC, Los Angeles, California
Foveomacular Vitelliform Dystrophy: Adult Type (January 1990)
A case study and comparison of vitelliform diseases involving lipofuscin and the
retinal pigment epithelium. Southern California College of Optometry Senior
Lectures, Fullerton, California
Optometric Examination of the Hospitalized Patient (September 1989)
Comprehensive, ocular examination of the hospitalized, bed-ridden patient
including discussion/presentation of geriatric ocular disease. Wadsworth
VAMC, Los Angeles, California

EXTERNSHIPS **Western Regional Blind Rehabilitation Center,**
Palo Alto Veterans Administration Medical Center, California
Specializing in Low Vision Eye Care, including telescopes, tints, and near vision aids for the legally blind

RESEARCH PAPERS Foveomacular Vitelliform Dystrophy: Adult Type
A case study and comparison of vitelliform diseases involving lipofuscin and the retinal pigment epithelium.
California Optometrists' perceived satisfaction of career choice vs. annual income and mode of practice
Through a comprehensive survey of California optometrists, I compared the doctor's perceived satisfaction of their career choice to their personal income and their mode of practice; namely, solo, partnership, or employee.

EMPLOYMENT Lewis Bliss, M.D. (March 1997 - present)
Carmichael, California
Senior/Managing Optometrist
Supervise, mentor, and assist all optometrists on staff. Provide comprehensive eye examinations, including specialty contact lens designs (keratoconus, post-refractive surgery, multifocal, etc.), treat glaucoma and acute eye disease. Manage long term ocular disease with primary care physicians and referring specialty physicians (rheumatology, neurology, etc.). Manage pre/post-operative cataract, refractive surgery (PRK, LASIK), glaucoma, and pterygium repair. Organize low vision training.

PERSONAL INTEREST I love spending my free time with my wife, 2 kids and 2 dogs. I thoroughly enjoy relaxing with a good book and tinkering with home repairs (which seems endless with two kids and two dogs).
